## MIECF - A Regional Platform for Effective Exchanges in Environmental Protection

The Macao International Environmental Co-operation Forum & Exhibition (MIECF) is hosted by the Government of the Macao Special Administrative Region of the People's Republic of China, with the support of the National Development and Reform Commission of the People's Republic of China, the Ministry of Science and Technology of the People's Republic of China, the Ministry of Industry and Information Technology of the People's Republic of China, and the Ministry of Ecology and Environment of the People's Republic of China, and is co-organised by the governments of the Pan-Pearl River Delta Region (PPRD).

Launched in 2008 and accredited by the Global Association of the Exhibition Industry (UFI) in 2011, MIECF brings together a series of professional international forums, exhibitions, business matching and networking activities, in which participants both at home and abroad take part. By organising high-level delegations to take part in the event, it promotes international co-operation between governments, industries, universities, research institutes, users and investors in the environmental protection area. MIECF aims to grow into an international exchange and co-operation platform that promotes technology transfer and sustainable development for the environmental protection sector in the "Belt and Road" countries and regions, the Pan-Pearl River Delta Region (PPRD), the Guangdong-Hong Kong-Macao Greater Bay Area, Portuguese-speaking countries, European countries and the rest of the world.

## Theme: Commitment to Green Development, Moving Towards the Dual Carbon Goals

Incorporating peak carbon emissions and carbon neutrality into the overall layout of building ecological civilisation is a major strategic decision by the People's Republic of China to achieve sustainable development. Under the theme of "Commitment to Green Development, Moving Towards the Dual Carbon Goals", 2022MIECF will follow the circular economy principles of "Reduce, Reuse, Recycle" and jointly promote a new pattern of green development through case analysis, policy analysis, technology demonstrations, and business networking to achieve dual carbon goals.

## MIECF's Combination of Online and Offline Platforms to Help Companies Explore Business Opportunities

In recent years, a series of online events have been added to MIECF. Online business matching, online protocol signing, online promotion, and online exhibition have been staged, helping companies from Mainland China, Portuguese-speaking countries, Macao and the rest of the world seize green business opportunities.

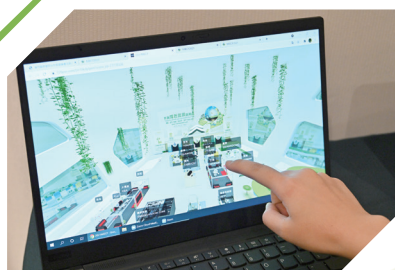

Online business matching supports companies in expanding green business markets despite time and geographical limits

MIECF provides trade visitors with an online business matching service to explore green business opportunities

A green mobility online promotion was held

An online exhibition was a new addition to the 2021MIECF

## 2022MIECF Highlights and Key Programmes

### Green Forum

Through online and in-person meetings, participants will share insights into the latest development policies and directions, corporate strategies, trends in the industry and many more.

### Green Showcase

Bringing together environmental products and solutions from both home and abroad, to empower green development. There is also an “online exhibition” which can help attendees participate despite time and geographical limits.

### Green Business Co-operation Day

Exchanging of ideas to promote environmental co-operation through experience sharing, networking cocktails and a signing ceremony.

### Green Matching and Networking Activities

A series of tailor-made business matching and networking activities, as well as an online business matching service will be held to enhance the efficacy of matching and exchange activities.

### Green Public Day

Raising awareness of environmental protection through a series of parent-child activities.

### Greenovation Zone

Introducing innovative environmental protection technologies and products, harnessing innovation to achieve the dual carbon goals.
