MIECF Official Website

MIECF - A Regional Platform for Effective Exchanges in Environmental Protection

The Macao International Environmental Co-operation Forum & Exhibition (MIECF) is hosted by the Government of the Macao Special Administrative Region of the People's Republic of China, with the support of the National Development and Reform Commission of the People's Republic of China, the Ministry of Science and Technology of the People's Republic of China, the Ministry of Industry and Information Technology of the People's Republic of China, and the Ministry of Ecology and Environment of the People's Republic of China. It is co-organised by the governments of the Pan-Pearl River Delta Region (PPRD), and co-ordinated by the Macao Trade and Investment Promotion Institute (IPIM) and the Environmental Protection Bureau (DSPA).

MIECF was launched in 2008 and accredited by the Global Association of the Exhibition Industry (UFI) in 2011. Over the years, it has been committed to improving the exhibition and its supporting services, hosting a train of high-level exchange activities, including themed conferences, green forums, project promotion and business matchmaking. In accordance with the "1+4" appropriate diversification development strategy, the event focuses on the green development of the tourism and leisure industry, as well as the four key industries, to further facilitate the international exchange and co-operation on environmental protection between governments, industries, universities, research institutes, users and investors, fully showcasing its role as a professional international platform for environmental protection.

Theme: Reaching the Dual Carbon Goals through Green Transformation

The 2024MIECF will serve as the third professional forum and exhibition held in succession on "carbon neutrality", accompanied by a string of professional international forums, exhibitions, business matching, as well as the Green Public Day and different exchange activities, to advance green and sustainable development in line with the country's "dual carbon" goals and the key environmental protection policies enacted by the Macao SAR Government, including the Long-term Decarbonization Strategy of Macao.

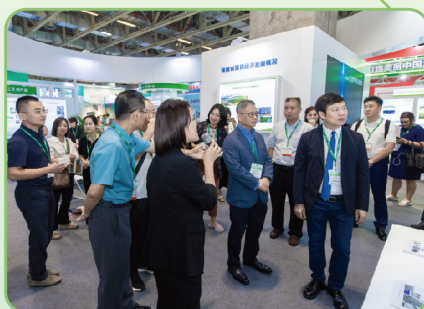

This year, the 2024MIECF will cover an assortment of topics, such as green transformation, ESG (environmental, social and governance), green finance and green technology industries, where experts will be invited to share new environmental protection technologies and their applications and discuss green development paths. In the meantime, the exhibition will include products and services on environmental protection, including carbon neutrality technology, energy management, water resource management, green transportation, wastewater management, eco-city integration and green buildings, in an effort to motivate enterprises' green transformation and join forces to explore green business opportunities.

Green Platform Delivers Fruitful Results and Diversified Activities Create Business Opportunities

Participants were satisfied with the overall event arrangements, which enabled them to pinpoint partners, expand their green perspectives through interaction and exchange, and fully utilise MIECF as an international green platform.

Participants learn about the latest green development trends

Extensive Promotion Opportunities

2024MIECF Highlights and Key Programmes

Green Forum

A number of cutting-edge topics on green, low-carbon and sustainable development will be discussed to keep the sector abreast of the latest developments in environmental protection around the world and seize the opportunities presented by green development.

Green Showcase

The 2024MIECF will invite high-potential exhibitors from Mainland China, Hong Kong, Macao and other parts of the world as once again, and at the same time, continue to enhance domestic and foreign investors' understanding of Macao's investment environment through exhibition so as to attract investment and enterprises to invest and develop business in Macao.

Green Business Co-operation Day

Create opportunities for environmental co-operation and exchange through experience sharing, networking receptions and signing ceremonies!

Green Matching and Networking Activities

Professional groups from different places will be invited to join a number of themed matching sessions and discussions in order to make full use of MIECF as a green platform to boost international exchange and co-operation on environmental protection.

Green Public Day

A series of promotional and educational activities on environmental protection will be organised during the Green Public Day to inform citizens attending the activities of the latest information and technologies regarding environmental protection and give them a taste of the green atmosphere so that they can develop a stronger awareness of environmental protection, live a greener life and jointly create a green, low-carbon living environment.

Scope of Exhibits

- Green Mobility
- Plastic Reduction
