MIECF - A Regional Platform for Effective Exchanges in Environmental Protection

The Macao International Environmental Co-operation Forum & Exhibition (MIECF) is hosted by the Government of the Macao Special Administrative Region of the People's Republic of China, with the National Development and Reform Commission of the People's Republic of China, the Ministry of Science and Technology of the People's Republic of China, the Ministry of Industry and Information Technology of the People's Republic of China, and the Ministry of Ecology and Environment of the People's Republic of China as special supporting organisations. It is co-organised by the governments of the Pan-Pearl River Delta Region (PPRD), and co-ordinated by the Commerce and Investment Promotion Institute (IPIM) and the Environmental Protection Bureau (DSPA).

The MIECF was launched in 2008 and accredited by the Global Association of the Exhibition Industry (UFI) in 2011. Over the years, it has continuously promoted green development, injecting vitality into international cross-sectoral environmental exchange and co-operation among governments, industries, education institutions, research institutes, users, and investors. In alignment with Macao's "1+4" strategy for appropriate economic diversification, the MIECF closely follows the "Macao + Hengqin" strategic positioning to strengthen regional environmental co-operation. At the same time, it serves as a green platform for fostering international exchanges and collaboration in the environmental industry, contributing to Macao's high-quality and sustainable socio-economic development.

Theme: Low-carbon, Zero Waste Cities: Embarking on a Global Collaboration

In alignment with the country's "dual carbon" goals and the key environmental protection policies of the Macao SAR Government, the 2026MIECF will, for the fifth consecutive year, serve as a professional exhibition achieving "carbon neutrality". Through organising a series of professional and international forums, exhibitions, and business matching, as well as the Green Public Day and various exchange activities, it advocates for the joint construction of a low-carbon, zero-waste, eco-friendly green city, and embarks on a collaborative journey to advance global environmental protection efforts.

As a key regional platform for environmental exchange and co-operation, this year's MIECF covers topics including industrial green transformation, eco-friendly green city construction, international energy collaboration, and green technology development. It brings together global environmental experts and renowned enterprises to share advanced environmental information and technologies, collaboratively exploring pathways for low-carbon, zero-waste city development. In addition, it introduces the "Zero-Waste Circular Economy Exhibition Zone" for the first time, showcasing environmental projects in low-carbon technologies, clean energy, water resource management, and green buildings. This facilitates the matching of global environmental resource supply and demand, explores further international green co-operation business opportunities, and empowers the construction of low-carbon, zero-waste cities.

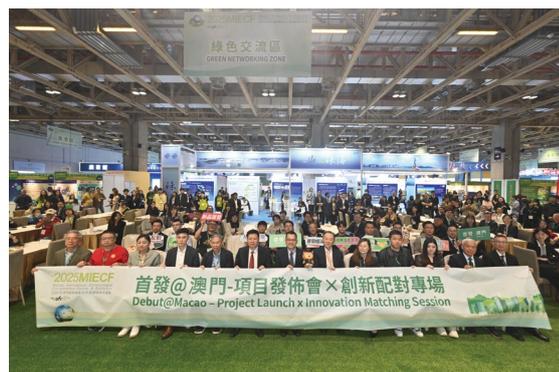

Green Matching sessions for traders

2026MIECF Highlights and Key Events

Green Forum

The latest topics on green and low-carbon development will be discussed to keep industry professionals abreast of global environmental protection trends and help them seize sustainable development opportunities.

Green Showcase

Inaugural launch of the "Zero-Waste Circular Economy Exhibition Zone", focusing on products and services across the upstream and downstream segments of the green energy industry chain, and establishing a platform for display, exchange, and project incubation.

Green Matching and Networking Activities

A variety of themed matching sessions and exchange activities will be elaborately organised to fully optimise MIECF's green platform to foster exchange and collaboration in the field of international environmental protection.

Green Public Day

A range of environmental education activities will be organised during Green Public Day to promote the latest green technologies, raise environmental awareness, and advocate environmental protection practices, encouraging the general public to jointly build a green and low-carbon living environment.

Green Exhibition

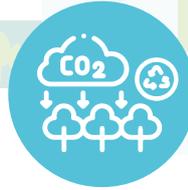

This year's MIECF will continue to reinforce the "green exhibition" concept and will serve as a professional exhibition on realising "carbon neutrality" for the fifth consecutive year.

Scope of Exhibits

- Green Mobility
- Plastic Reduction
- Waste Management Solutions
- Water and Wastewater Management Solutions

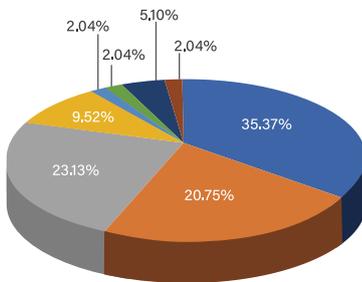

- Carbon Trading Industry
- Air Quality
- Energy Efficiency and Renewable Energy
- Green Building

- Soil Recovery and Old Site Decontamination
- Environmental Monitoring and Environmental Big Data Services
- Eco-Cities Total Solutions
- Environmentally-Friendly Products and Services

Previous Participants

- Enterprisers / Business Partners / Company Presidents / Managing Directors
- Top Management (Vice Presidents / General Managers / Directors, etc.)
- Middle Management (Department Heads / Managers, etc.)
- Executives (Supervisors / Assistants, etc.)

- Government Officials / Public Servants
- Academics
- Technical Specialists
- Others
